zixira,
careers@zixira.com

Dear Sir/Madam,

As an admirer of zixira's focus on improving user experience, I'm excited to apply for your newly announced Software Engineer (ASSOCIATE SOFTWARE ENGINEER) position. I believe that my 2+ years of experience, BSc in Applied Science, and the commitment to build user-centric applications make me a great addition to your team.

In my current role as a Full Stack Developer at HYFIC GEEKS(Pvt) Ltd I've shown a skill for Java and Spring Boot to craft user-friendly web applications. I've also demonstrated my ability to improve the security of the apps by using spring-security and JWT tokens. I can also identify the bugs and streamline the code and also add functionality, particularly incorporating Microservices.

I was recently involved in developing a high-traffic ecommerce website which made use React js as the frontend framework. The following is a snapshot of my broader technical skills:

- Agile Project Management
- Custom Web Applications
- Front End Development(React/Material-UI/Bootstrap/Angular/Angular material)
- Back End Development(Spring Boot/Hibernate/Node js/Express js)
- Spring Security and Microservices

It would be a pleasure to learn more about zixira's needs, and I would welcome the chance to provide further insight into my knowledge of technical abilities, personal attributes, and track record of success in building revenue generating web technologies compatible across multiple platforms, browsers, and devices.

Thank you.

Sincerely,

Manoj Vitharana

Full Stack Developer specializing in Spring Boot framework. Experienced with building REST services with Spring microservices and Spring Boot.

Looking for a challenging role in a reputable organization to utilize my technical, web, Spring Boot and management skills for the growth of the organization as well as to enhance my knowledge about new trends in IT sector.
